

Rammer® RCC30R

CUTTER CRUSHER DEMOLITION TOOLS

Rammer® Cutter-Crushers are your all-round solution to primary demolition of heavy built-up concrete structures for carriers between 3 to 130 tons

APPLICATIONS

Demolition

Recycling

MAIN FEATURES AND BENEFITS

INCREASED POWER-TO-WEIGHT RATIO

Increases the power-to-weight ratio of the product by intensifying the input pressure into the cylinders

FIELD REPLACEABLE WEAR PARTS

Designed for quick and easy maintenance

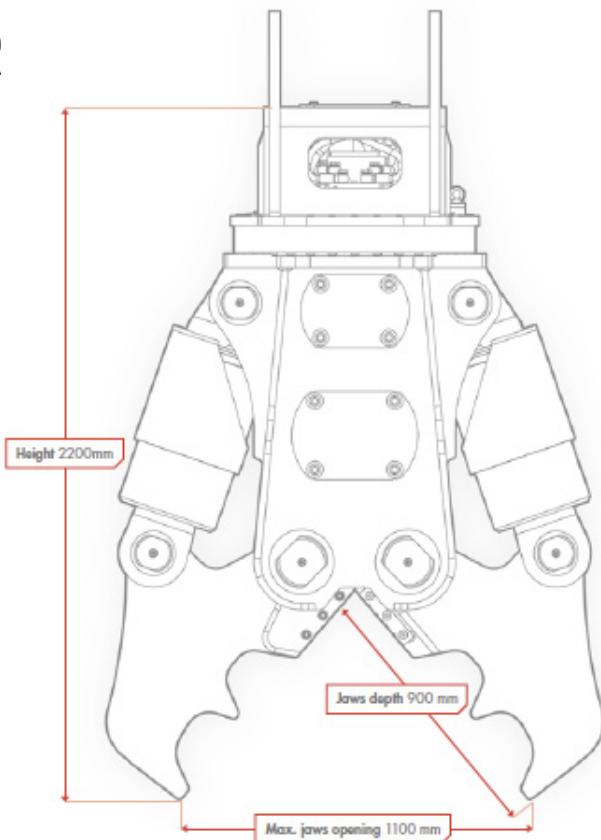

RAMMER READY

Same bolt pattern as Rammer hammers

HEAVY DUTY COMPONENTS

Extreme durability for any application ensures long component life span

Rammer® RCC30R

Specifications

Minimum working weight	6,290 lbs (2855 kg)
Weight	2,640 lbs (2640 kg)
Max jaw opening	40.94" (1100 mm)
Jaw depth	35.4" (900 mm)
Max cutting force	3920 kN
Max crushing force	1420 kN
Max operating pressure	4640 psi /320 bar
Max diameter to be cut	2.48" (63 mm)
Cutting blade length	9.84" (250 mm)
Rotation	360 °
Closing time at max oil flow	2.3 s
Opening time at max oil flow	4.0 s
Carrier weight range	52900 lbs - 77200 lbs (24-35 T)

Specifications are subject to change without notice

Developed and tested in the harshest of conditions, the foundations of Rammer products are quality, operational reliability and maximized productivity. Long working life and durability ensure our attachments can be used efficiently and economically no matter the challenge at hand, making Rammer a sustainable choice.
