

Rammer® RGP20R

GRAPPLE DEMOLITION TOOLS

Rammer® RGP Grapples have been designed and tested with demolition in mind. The RGP Grapples are suitable for demolition and material handling: robust for heavy work, but also accurate for picking and sorting applications. They offer large volume for bulk loading, making it also ideal for waste handling

APPLICATIONS

 Excavation	 Building Construction	 Demolition	 Recycling
 Special	 Crushing & Screening	 Loading	

MAIN FEATURES AND BENEFITS

LOWER OPERATING COSTS

The protected rotation system allows precision tool placement resulting in lowering owning and operating costs

FIELD REPLACEABLE WEAR PARTS

Designed for quick and easy maintenance

RAMMER READY

Same bolt pattern as Rammer hammers

HEAVY DUTY COMPONENTS

Extreme durability for any application ensures long component life span

Rammer® RGP20R

Specifications

Minimum working weight	3260 lbs (1480 kg)
Weight	2870 lbs (300 kg)
Max jaw opening	78.74" (2000 mm)
Jaw width	39.37" (1000 mm)
Max operating pressure	5075 psi / 350 bar
Rotation	360°
Carrier weight range	39700 lbs - 48500 lbs (18-22 T)
Volume / Material capacity (inside jaws when closed)	184 gal (700 L)

Specifications are subject to change without notice

Developed and tested in the harshest of conditions, the foundations of Rammer products are quality, operational reliability and maximized productivity. Long working life and durability ensure our attachments can be used efficiently and economically no matter the challenge at hand, making Rammer a sustainable choice.
